

Argeş 16 – cultivar obtained by hybridization between the *Notorius x Heinz 2274* cultivars

Plant characteristics:

- Cultivar with determined growth and average vigor;
- Forms 5-6 inflorescences per plant, with 6-7 flowers per inflorescence;

Fruit characteristics:

- Large fruits (average weight 180 g), elongated, red in color (44 A), with few seeds, firm pulp and pleasant taste (average acidity of 3.5% g/l malic acid and 4.1% soluble dry matter); rich content in antioxidants and organo-mineral nutrients;

Ripening period:

- Medium-ripening cultivar;

Average production:

- The plant can produce on average from 4 - 4.5 kg;

Tolerance:

- It is tolerant to tomato pests;
- It is recommended for classical or organic cultivation, in protected areas and in the field with a training system;
- It has a high capacity to adapt to different environmental conditions;

Production direction:

- It is suitable for fresh consumption and industrialization;

Maintainer: INCDBH Ștefănești
