

Argeş 20 – cultivar obtained through genetic selection in the population of the *Argeş 11* cultivar

Plant characteristics:

- Determinate growth variety; forms 6-7 inflorescences per plant, with 5-7 flowers per inflorescence;

Fruit characteristics:

- Very large fruits (average weight 220g), slightly elongated (towards pyriform), bright red (44A) in color, with few seeds, firm pulp, pleasant taste (average acidity of 3.1% g/l malic acid and 3.8% soluble dry matter); rich in antioxidants and organo-mineral substances;

Ripening period:

- Late-ripening cultivar;

Average production:

-The plant can produce an average of 5 kg; with appropriate technology it can exceed 5.5 kg/plant;

Tolerance:

- It has tolerance to harmful organisms specific to tomatoes;
- Recommended for classical or organic cultivation, in protected areas and in the field with training system;

Production direction:

- Suitable for fresh consumption and industrialization; resistant to preservation;

Maintainer: INCDBHȘtefănești
